Dog Vaccine Schedule (2026)

Puppy & adult shot chart — based on AAHA / WSAVA guidelines · petcalculatorhub.org

Puppy Vaccine Schedule (6 Weeks to 1 Year)

Age	Core vaccines	Lifestyle (by risk)
6–8 weeks	DAPP / DHPP #1 (distemper, adenovirus/hepatitis, parvovirus, parainfluenza)	Bordetella
10–12 weeks	DAPP #2; Leptospirosis #1	Lyme #1; Canine influenza #1
14–16 weeks	DAPP final; Leptospirosis #2; Rabies #1	Lyme #2; Canine influenza #2
~12 months	DAPP, Rabies & Leptospirosis 1-year boosters	Lifestyle boosters

Key rule: the final parvovirus/distemper dose must be given at or after 16 weeks of age. Wait 1–2 weeks after the last puppy shots before dog parks or busy public areas.

Adult Dog Vaccine Schedule (1 Year & Older)

Vaccine	Type	How often
DAPP / DHPP	Core	Every 3 years
Rabies	Core (required by law)	Every 1 or 3 years, by product & local law
Leptospirosis	Core in many regions	Every year
Bordetella	Lifestyle	Every 6–12 months (boarding, daycare, grooming)
Lyme disease	Lifestyle	Yearly (tick-heavy / endemic areas)
Canine influenza	Lifestyle	Yearly (social, travelling, show dogs)
